Rise First Grade Program

ELA

Teacher's Manual

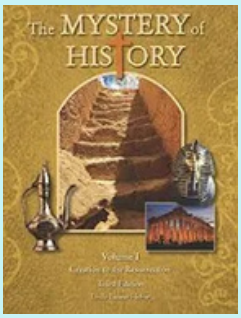

Two-Day Program: M/W Missouri City, T/TH in Pearland, $400/month

Available at both Missouri City and Pearland locations. Curriculum prices may vary. Prices listed are based on the price at the time of publishing.

Logic of English Foundations B Bundle $105: Teacher Manual and Workbook Third Edition Logic of English introduces young learners to the building blocks of reading and spelling through systematic, multisensory instruction. Using Logic of English Foundations A as the curriculum foundation, students develop phonemic awareness, handwriting, and early reading skills while learning the logic behind English sounds and spelling patterns. Instruction emphasizes mastery, confidence, and joyful learning as students progress from sounds to words to simple sentences.

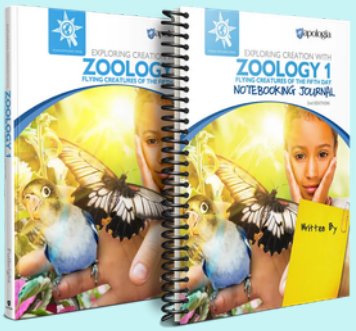

HISTORY

optional

SCIENCE

Mystery of History introduces young learners to the people and events of the past through stories, discussion, and hands-on activities. Using The Mystery of History as the curriculum foundation, students explore history chronologically while developing listening skills, vocabulary, and a sense of time. Lessons emphasize curiosity and wonder as students begin to see history as a connected story within God's plan.

Apologia Science Zoology: Flying Creatures. Curriculum: Apologia – Young Explorer Series: Flying Creatures of the Fifth Day. Third Edition. Rise's K–3 Zoology course introduces young learners to the world of birds and flight through hands-on activities, observation, and guided discussion. Using Apologia as the curriculum foundation, students build curiosity, scientific vocabulary, and a love for learning while exploring God's design in creation**.**

Math with Confidence $50: Building Confidence. Curriculum: Math with Confidence Series introduces young learners to problem-solving through hands-on activities, interactive games, and guided practice. Students develop conceptual understanding and a love for learning while building confidence in their mathematical abilities. Lessons are designed for both classroom engagement and parent-guided support at home. The Instructor Text contains scripted guidance for all lessons, with explanations to show you why and how these math concepts are important. And the two Workbooks provide your students with a whole year of age-appropriate practice and review for every concept.
